CYMS OVERVIEW

CYMS

Child & Youth Management System

By Vermont Systems, Inc.

© 1999-2000

Welcome to the CYMS Overview Demonstration

To move through this demo, use your spacebar to advance the screens or your arrow keys to move forward and back!

Anytime you see a underlined word or symbol, you may click with your mouse to advance to that screen or go back to the Table of Contents

CYMS – Child & Youth Management System

- CYMS is a comprehensive child care software program.
- Everything your staff needs for day-to-day operations is taken care of in CYMS.
- It knows who your children are, where they are, what medical needs they have, how much money they owe, when their annual registration expires, etc.
- All of this information is available in report format and/or by simply querying the database.
- This demo will focus on certain features of CYMS . . .

This Demo Will Illustrate the Following CYMS Features:

I. Household Overview: Shots, allergies, illnesses, medical conditions, special needs, financial information

II. Automated (installment) billing of customers in weekly, bi-weekly, monthly or quarterly cycles with fees based on the customer's income level.

III. What happens during a payment?

IV. Visit processing (including plastic card printing with photo ID) and hourly care reservations with fees based on the actual time in the building. USDA information is tracked as well.

V. Real time current attendance inquiry and quick print of who is in your building at any point during the day.

VI. Search for Care / Waitlists for projected, preference and excess demand.

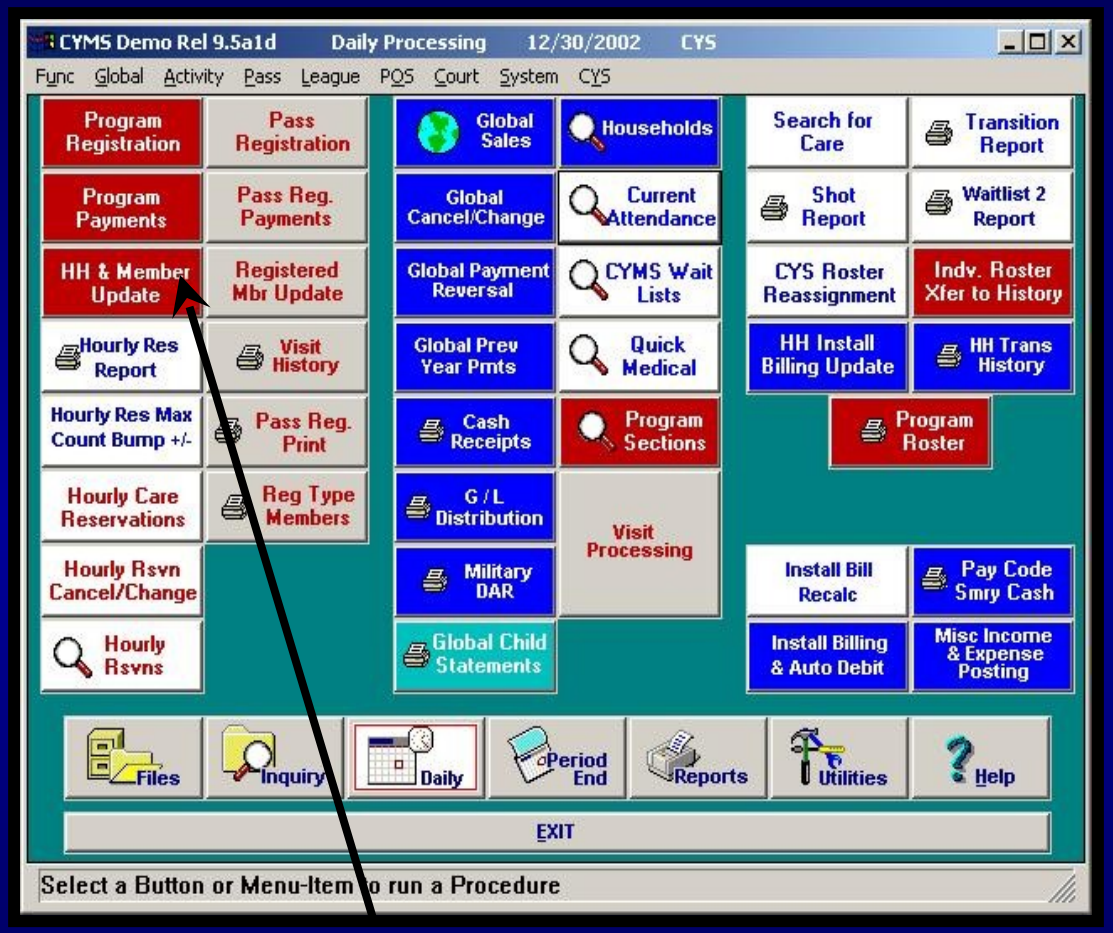
VII. Reports: Hundreds of reports that can be run and emailed, including the DAR., Shots, Allergy, Roster, Waitlist, Visit History, Labels and Letters, the Annual Report, USDA meal reports and more.

VIII. Full tracking of staff records, including training records, room visits, credentials / evaluations, recognition and medical records and more!

IX. Full tracking of home provider records, including training records, home visits, background checks, pets, days & hours, medical records and more!

X. Security / Other Features for all staff that need access. Custom screens and permissions by groupings and individuals.

I. Household Features



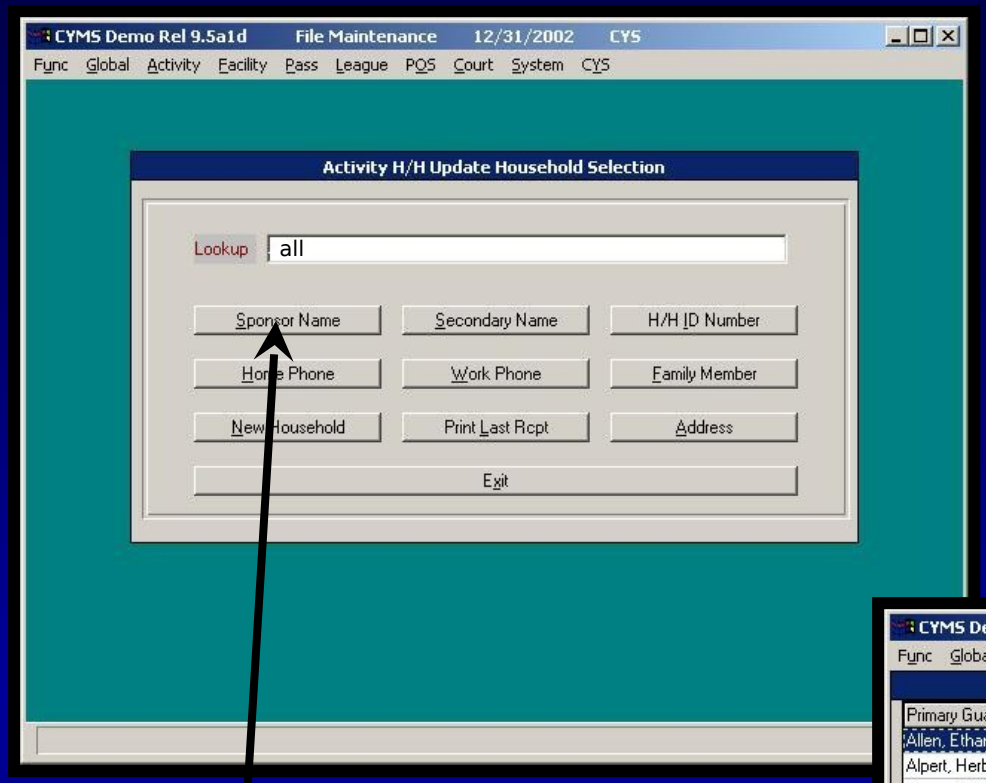
To access household information from the main screen select the "HH & Member Update" hot button.

CYMS offers extensive tracking of all the households that use your child care program

Information tracked on each household includes:

1. Name, Rank, SSN of the sponsor and spouse
2. Up to 999 emergency contacts for the children.
3. Financial information on the household including USDA income and household income levels.
4. Children's information including birthday, grade, shot records medical/special needs, allergies, and illnesses

<<Back to T.O.C.



On the Lookup Screen, you may type in any portion or all of a person's last name, (e.g., for "Allen, type "all") and click the "Sponsor Name" button.

Each button is a different method of looking up a household.

Feel free to explore!

When the correct household is highlighted on the Listing Screen, "double click" the entry or click the "Select" button in the bottom left corner of the screen.

Screen 3: Financial Screen

Screen 4: Emergency/Misc Screen

USDA & Family Income fields help calculate child care fees and USDA reimbursements

Up to 999 emergency contacts! Quickly accessed!

User codes can be used to link like households together. The codes in this demo database represent housing areas, but are completely user defined. User codes are valuable marketing/statistical tracking tools.

The Family Member Listing Screen

- Family member #1 must always be the Sponsor !
- Family member #2 must always be the Spouse !

  (Sole/Single military personnel will have "No Spouse" listed as family member 2 for annual report purposes).

- Family members with a number 3 and greater are always children / dependents.

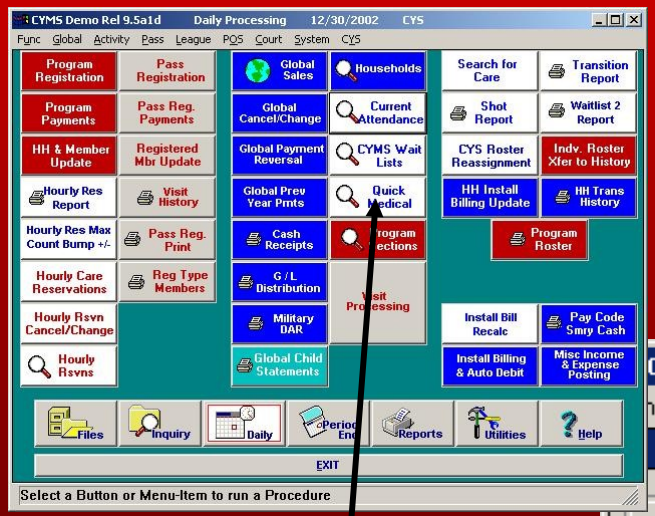
Add Shot
Load Std Shot
Update Shot
Delete Shot

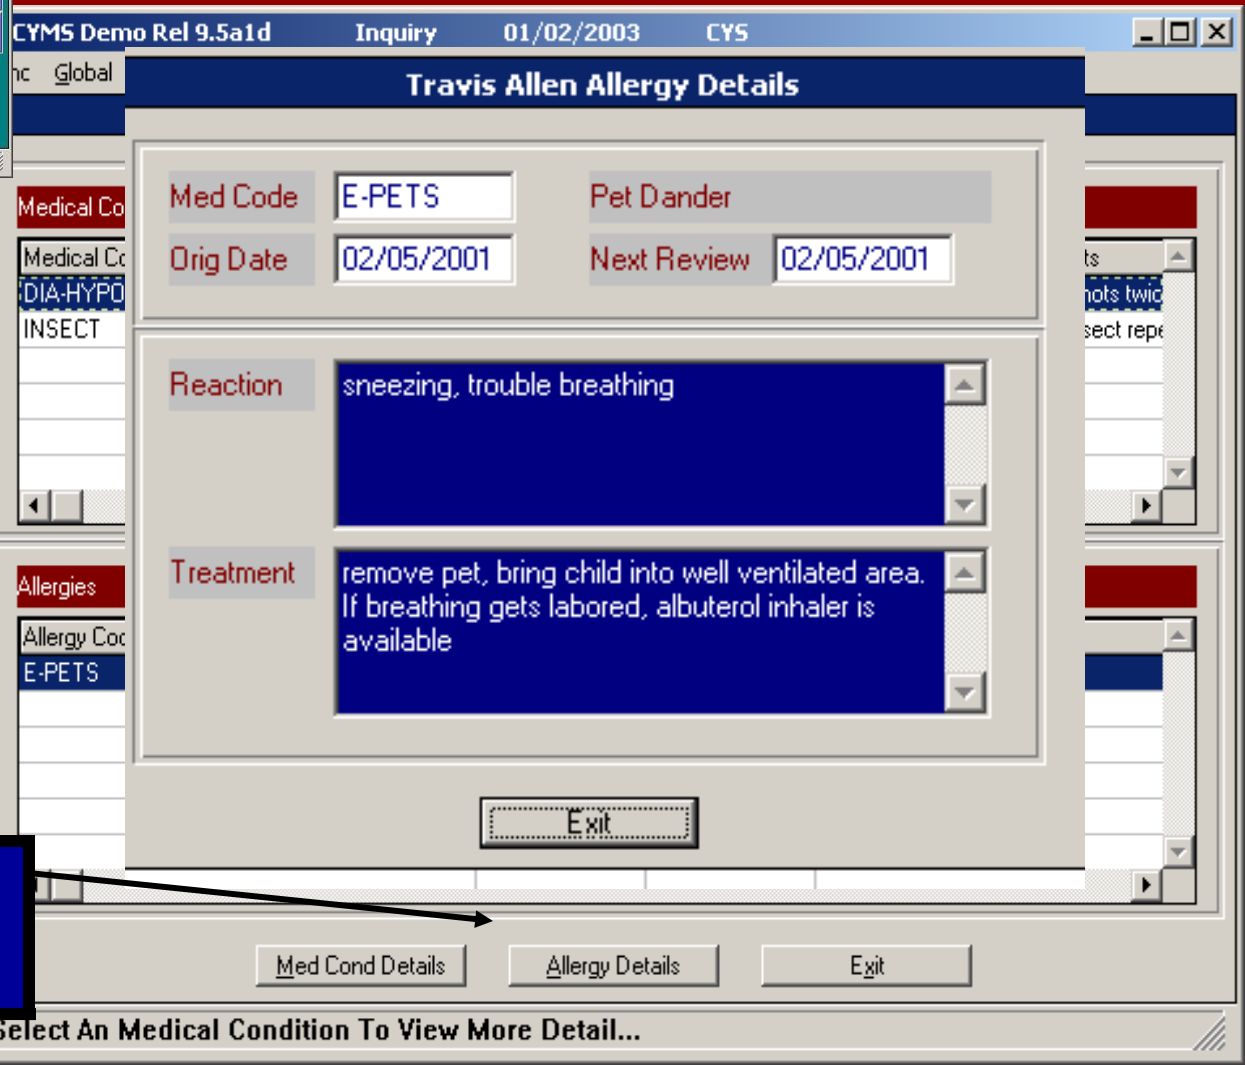
The "**Load Std Shot**" button is a feature of the shots screen.

When the clerk clicks this button, the system will search for any shots that are coded "standard" and link them to the child. The due dates are automatically calculated based on the child's birthday!

This saves a lot of time and calculations!

Quick Medical Inquiry





Medical and Allergy information are at your fingertips with the Quick Medical Inquiry.

Simply click the button labeled "Quick Medical" and look up the child

More information is available by clicking on "Med Cond Details" or "Allergy Details"

II. Installment Billing Overview

Installment billing in CYMS is the process of billing your customers for child care.

The billing is done in “installments” (regularly scheduled bills that occur either weekly, monthly, bi-weekly or quarterly)

- CYMS:
  - Automatically calculates additional child discounts
  - Calculates fees based on total family income and DoD rate categories
  - Automatically recalculates fees when a household’s income level changes
  - Automatically recalculates bill amounts when a household adds more family members to your center or when a child leaves your care

It is as easy as 1,2,3 . . .

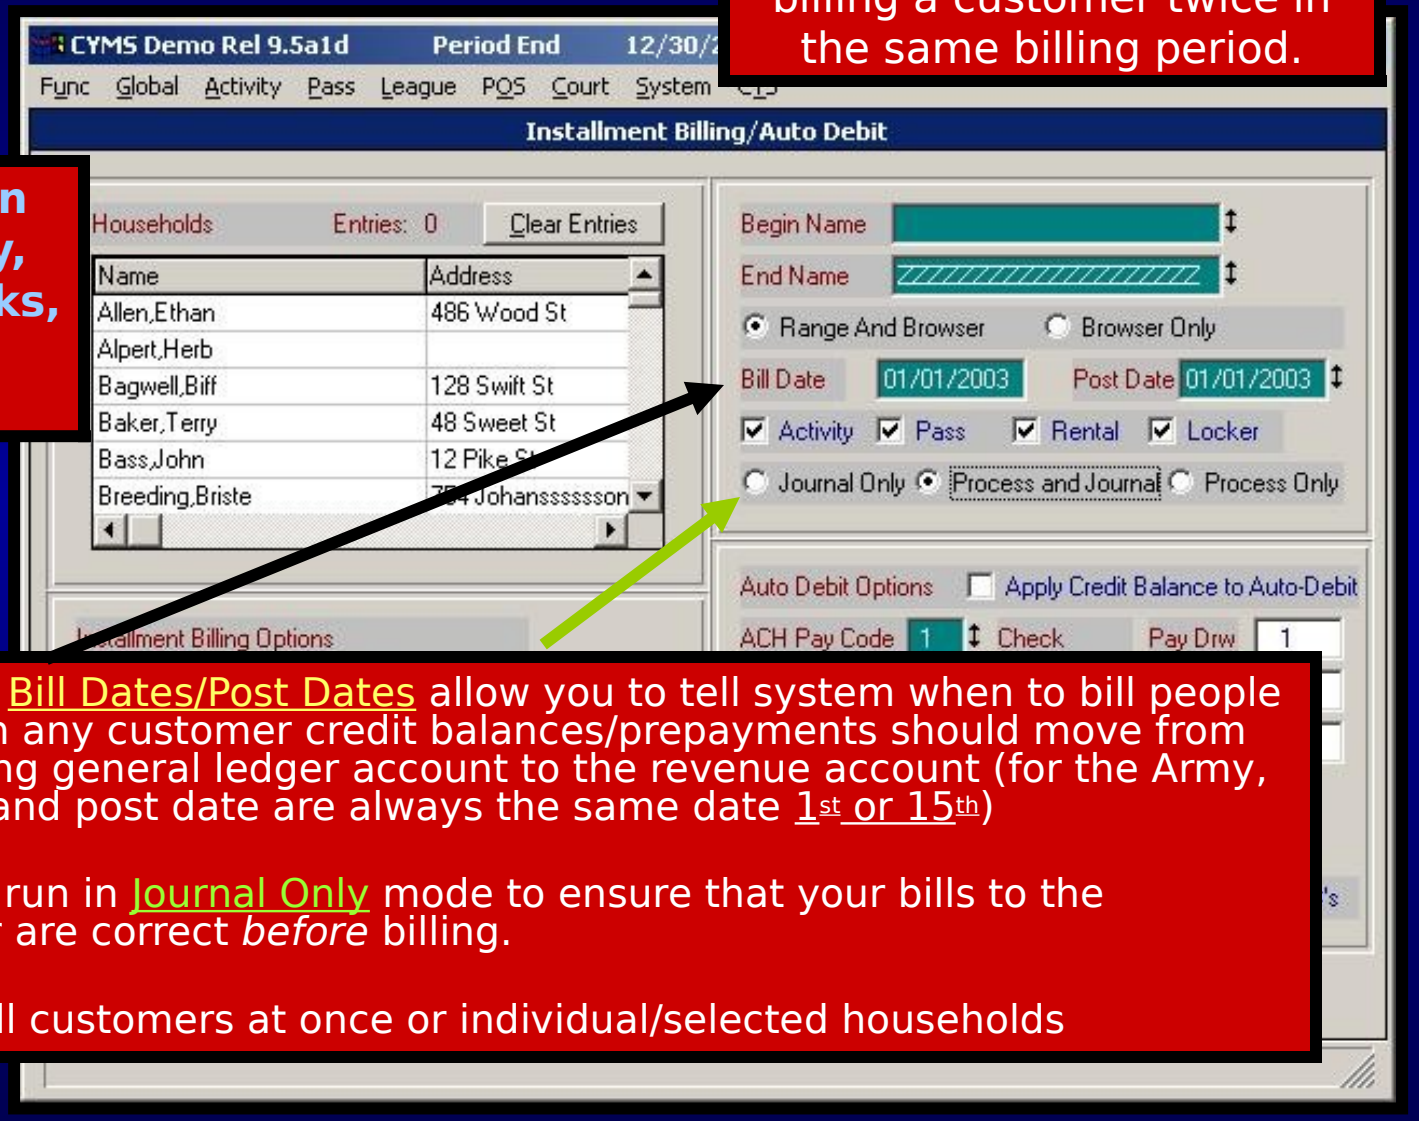
Step 1
The Installment Billing Recalc program will cycle through every household with enrollments and calculate what they should be charged.
This program accounts for changes in household enrollment totals and income levels since the last billing period.
It will always “maximize” your dollars, giving any additional child discounts to the least expensive program.
Enter the SELECTED HOUSEHOLD to process...

Step 2 Installment Billing

Installment billing guards against user error by never billing a customer twice in the same billing period.

The billing can be run weekly, every two weeks, monthly, or quarterly!



- Separate Bill Dates/Post Dates allow you to tell system when to bill people and when any customer credit balances/prepayments should move from the holding general ledger account to the revenue account (for the Army, bill date and post date are always the same date 1st or 15th)
- Ability to run in Journal Only mode to ensure that your bills to the customer are correct *before* billing.
- Run for all customers at once or individual/selected households

Step 3

Review the detailed report that is produced, and that's it!
All your customers have been billed according to your organization's fee schedule!

Date, time, clerk, references, what program was paid for

— all this and more print on the receipt

CYMS tracks the who, what, when and how of every single transaction that occurs —

See the next page

Where did that payment really go?

CYMS tracks the who, what, when and how of every transaction in the system. This makes troubleshooting and examining historical records exact, detailed and easy to understand

- Who➔ Who is making a payment? Who is the clerk taking in the money?
- What➔ What program is this money for? What General Ledger accounts need to be credited? What Cost Centers? What cash drawer took the money in? What Check/Credit Card # was used?
- When➔ When did the transaction occur (date/time)?
- How➔ How did the payment occur (Check, Cash, etc)?

Every transaction in CYMS has links to the Household History, Cash and General Ledger records,

This information is then used to automatically print your D.A.R.!

Rcpt Numb	Date	Time	Clerk	Household	Mod	Txn Type	Pmt	Reference	Col	Amount

Q:

There is a lot of activity happening during a payment —

Will my clerks have to input all that information at the time of payment?

A:

No.

The clerk is responsible for making the payment. The rest is done by the system.

IV. Visit Processing

Keeping track of the children in your care is essential.

CYMS stores detailed visit information of every child who comes into your building!

100% user definable layout, from static headers and images to variable information (name, address,birthday, etc).

Unlimited Card Layouts!

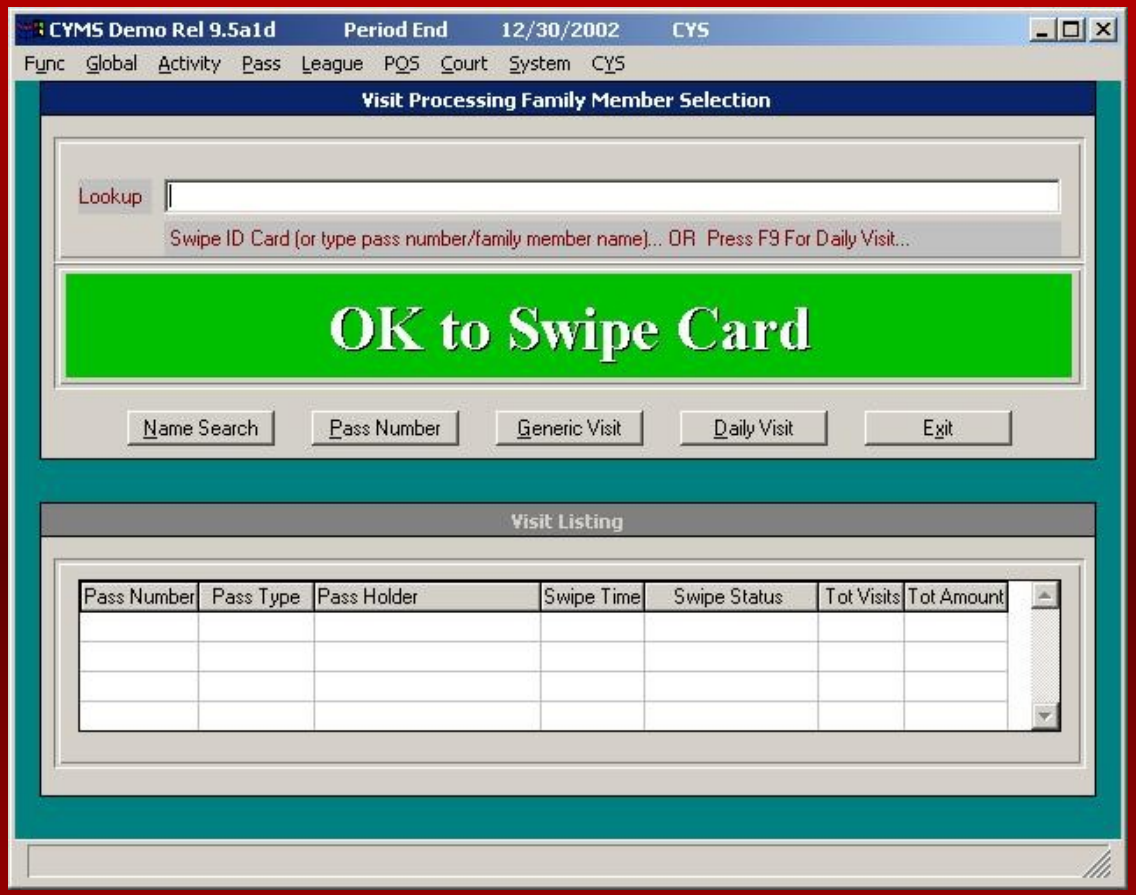
Barcode for easy swiping.
Mag Stripe capabilities also supported

Photo of Child — optional.
Usual practice is photos for School-age and older

<<Back to T.O.C.

As Children Swipe In/Out of CYMS:

- USDA information is being tracked
- All overdue shots will display to alert the clerk
- Household messages display to alert the clerk of important information, for example an overdue family care plan
- Date, time in/out, child, and location of the visit are stored in the database for detailed statistical reporting
- Hourly reservations are being checked
- Hourly fees are automatically calculated on the swipe out

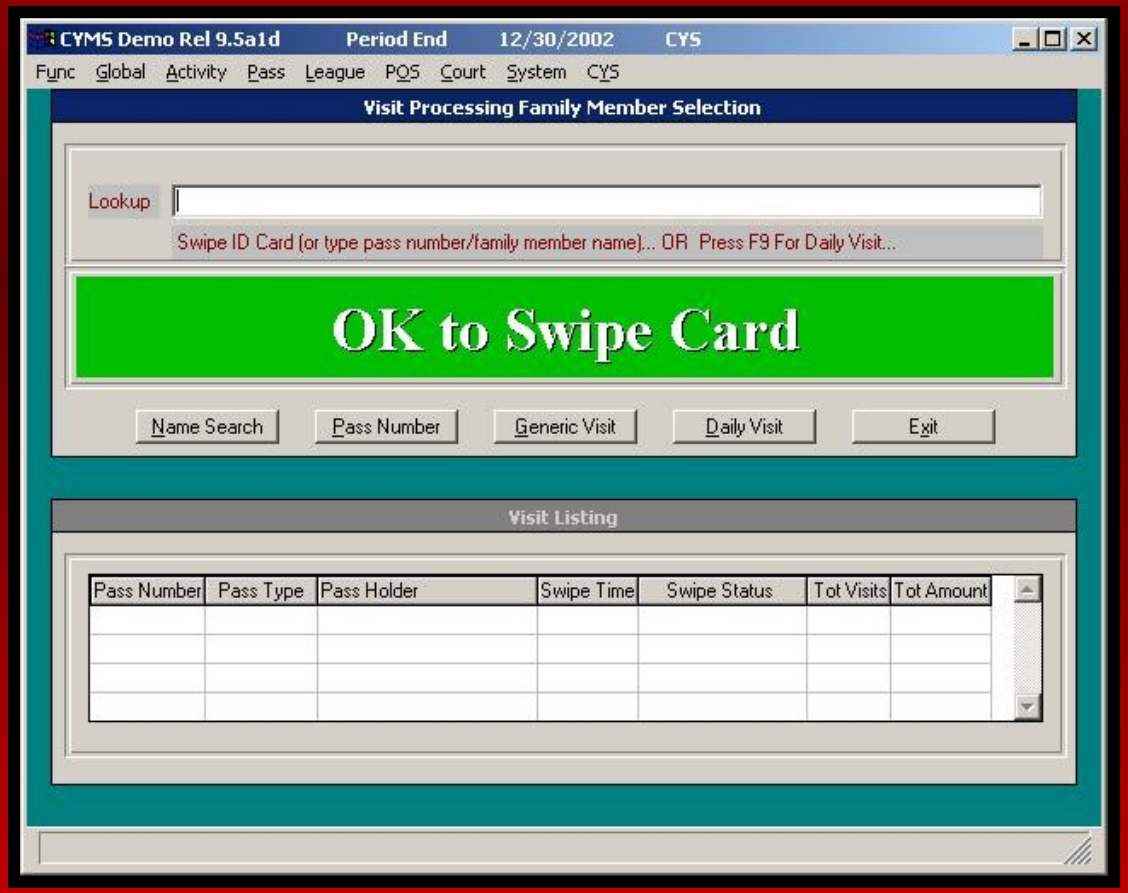


- At any point in time clerks can click the "current attendance inquiry button" to find out what kids are in the building and what room they are in
- Late pickup fees are automatically calculated

The Swiping Process:

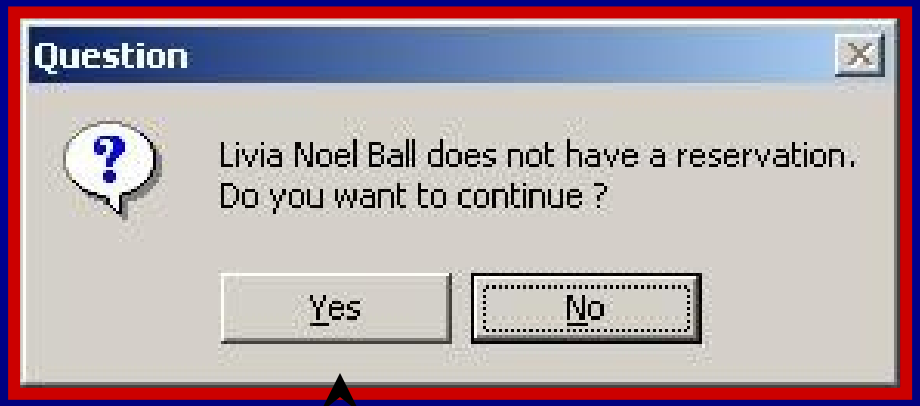
Swipe ID Card at prompt

Choose care type:



Various messages may pop up at time of visit:

Any shots past due



Hourly reservation information (times of reservation, whether patron is early, late, or has a reservation at all)

Household reminders / notices

During the swipe out of an hourly care patron, CYMS calculates fees based on how long the child was in your care.

Late (pickup) amounts are based upon the time the swipe out occurs.

The clerk will then continue to the payment screen to finish off the transaction

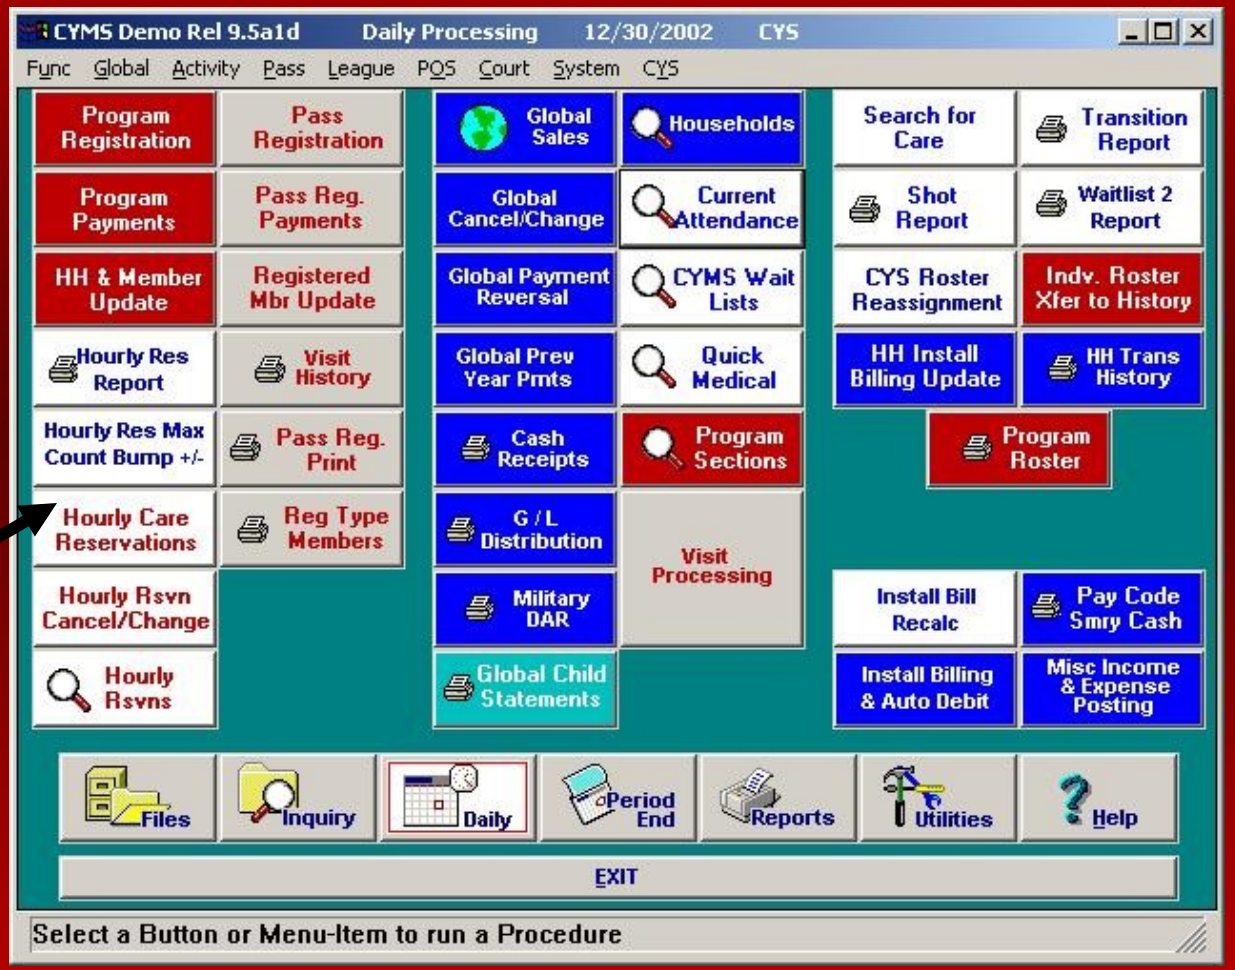
Hourly Care Reservations

Making an hourly care reservation in CYMS is swift and easy.

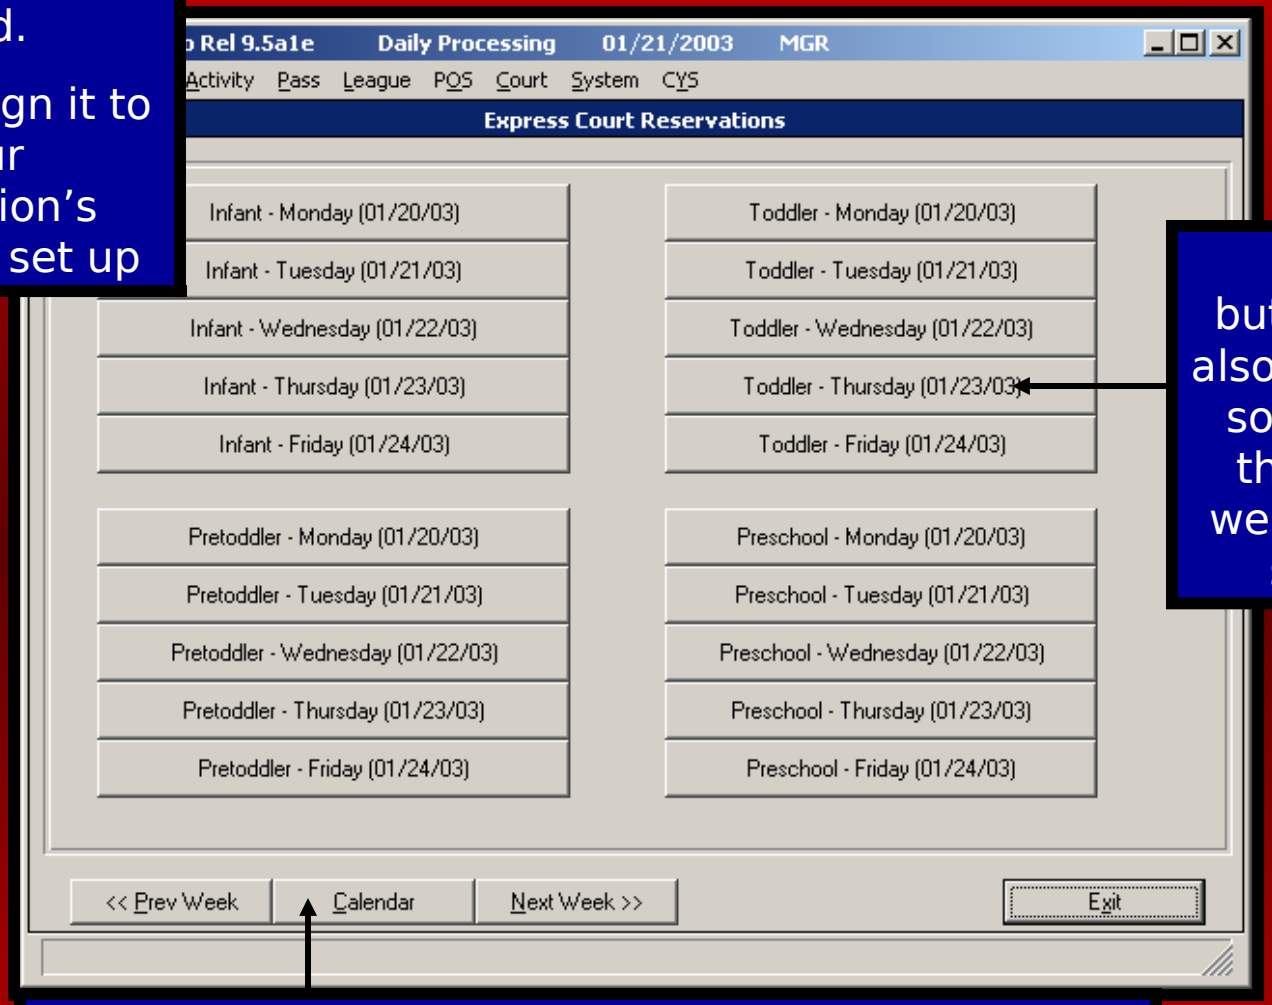
Start with the Hot Button labeled “Hourly Care Reservations”.



<<Back to T.O.C.

This screen is user defined.

We can design it to fit your organization's hourly care set up



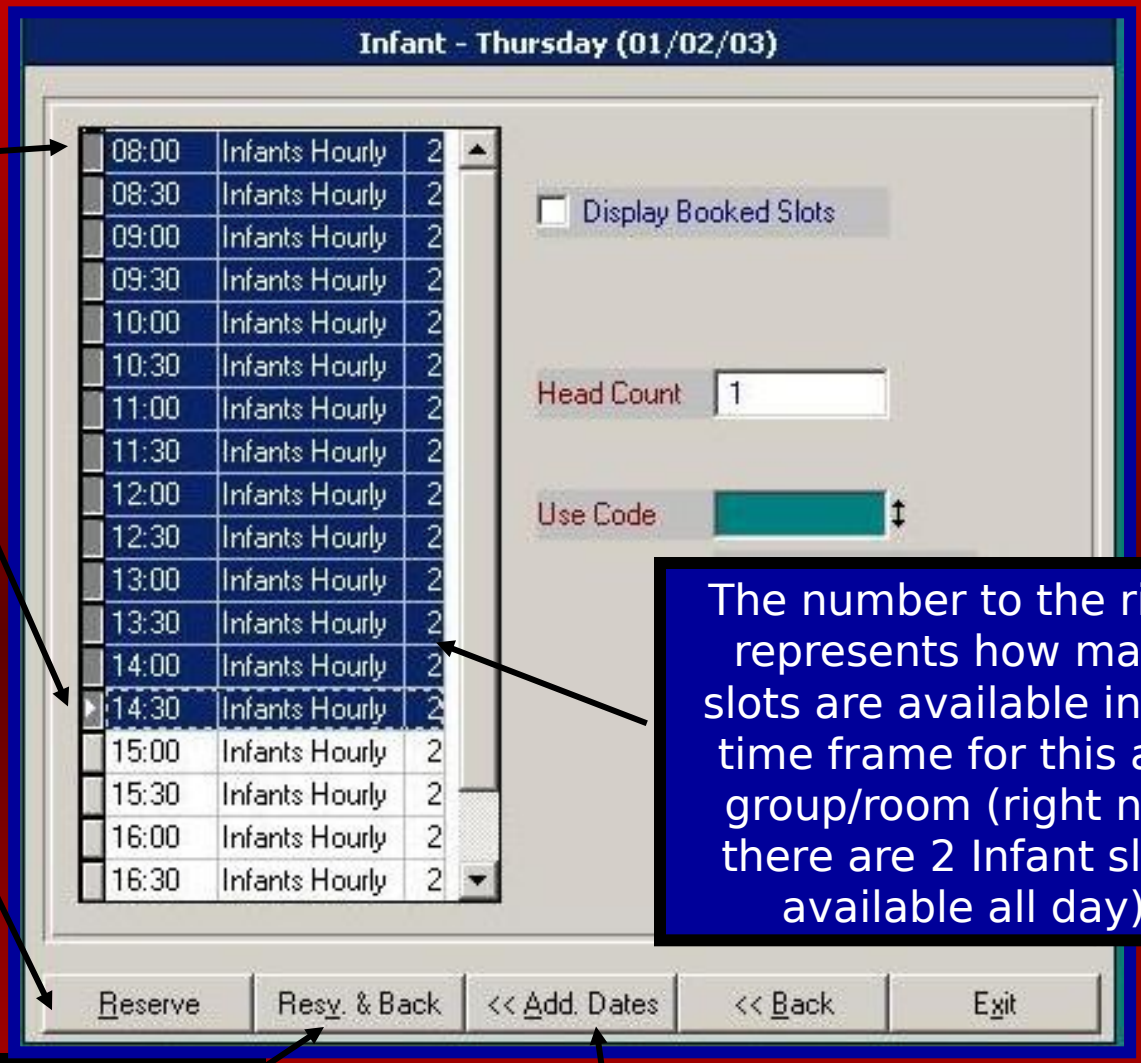
These buttons can also be set up so you see the entire week on the screen

Reservation not for today or this week?

Simply click on the calendar and select the day you want to reserve

To make a reservation simply click and drag in the gray rectangle over the times desired

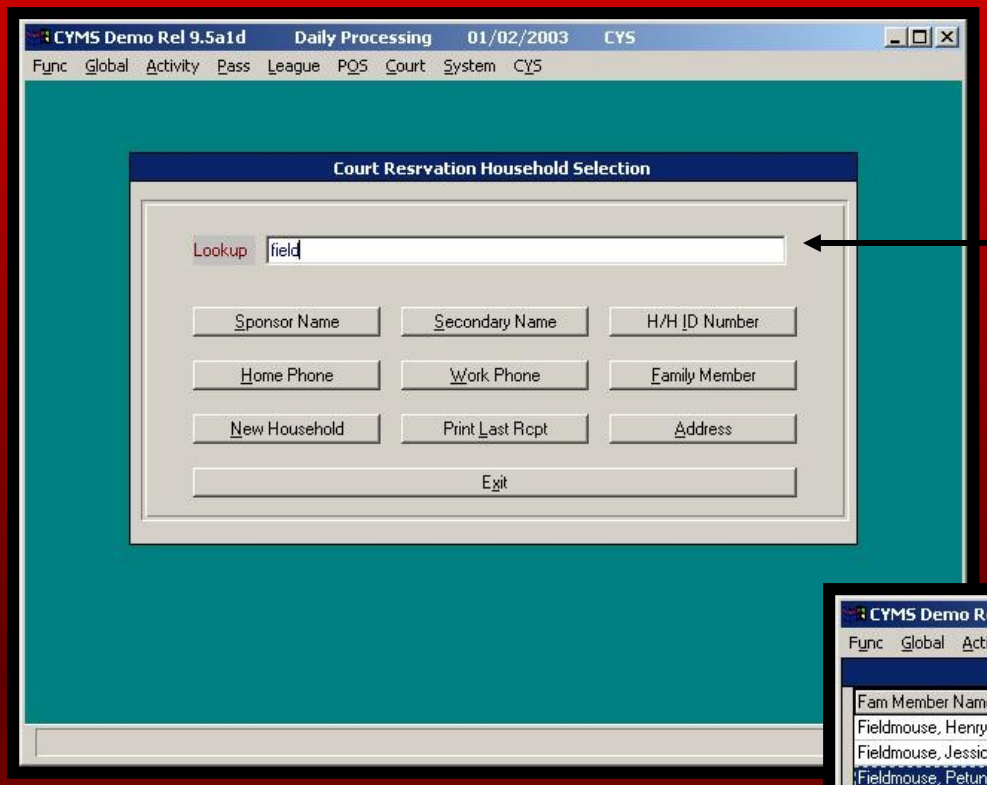
Reserve: You are finished with the desired times/days and wish to finalize the reservations by linking them to a child



The number to the right represents how many slots are available in the time frame for this age group/room (right now there are 2 Infant slots available all day)

Resv & Back: You wish to make the present set of reservations for the child and then return to the reservation screen to make reservations for a different child

<<Add Dates: Additional dates beyond the present date for the child are needed



Type in a portion of the child's last name in the Lookup field and click the "Family Member" button.

Highlight the child that needs the reservation and click Select.

That's it. You just made an hourly reservation!

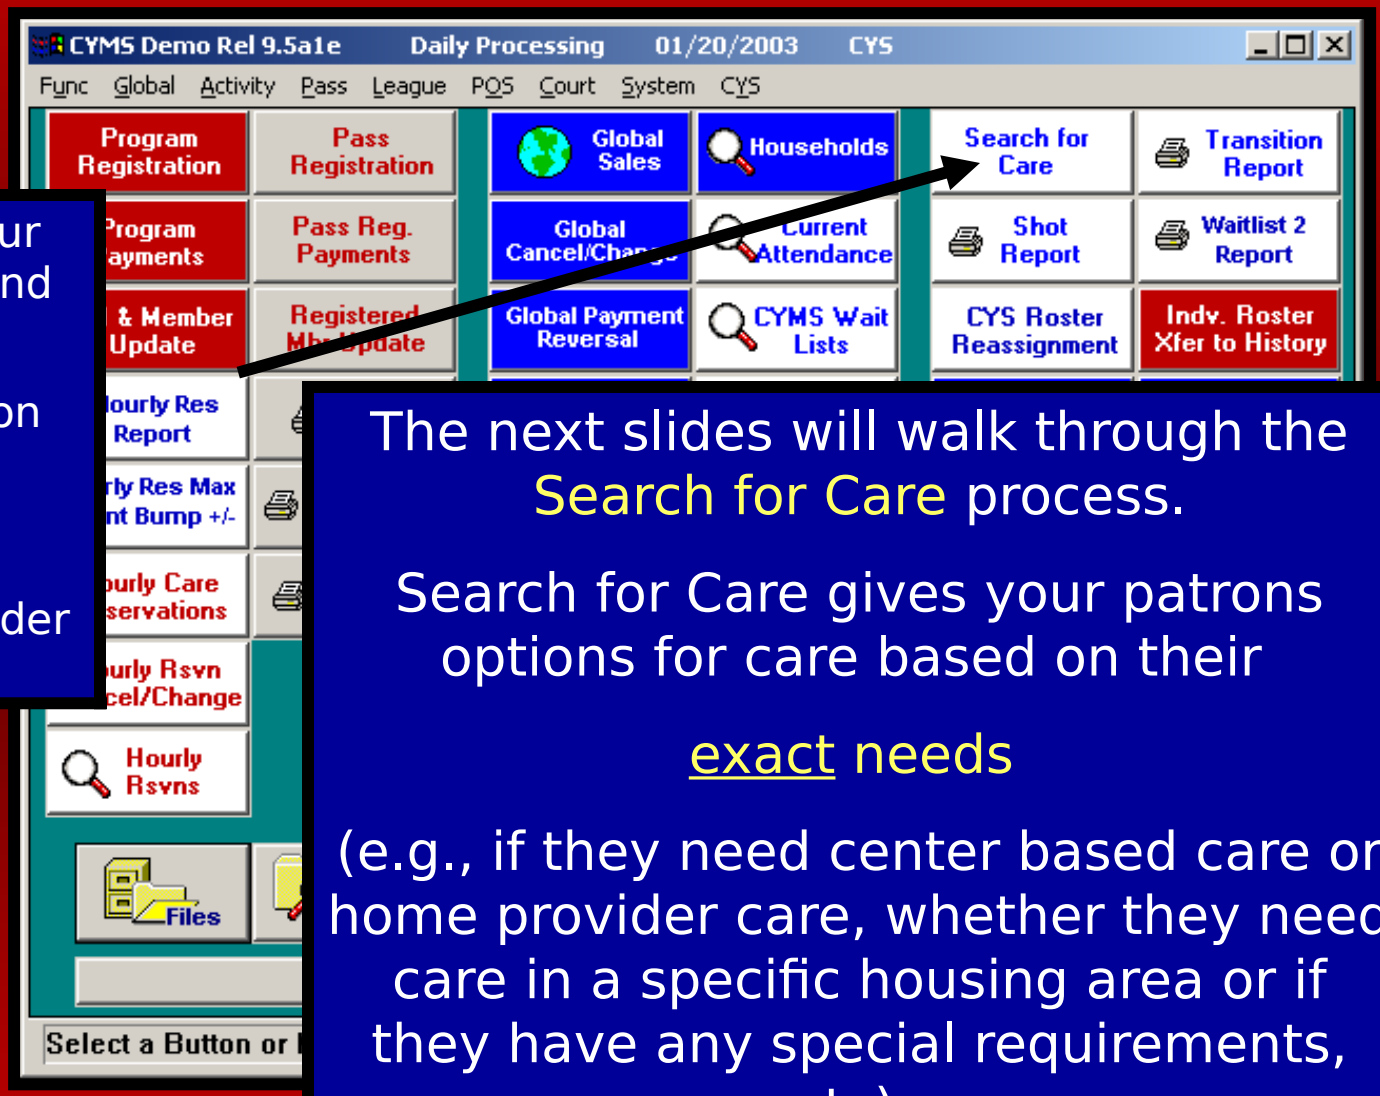
VI. Search For Care

CYMS offers your clerks a quick and easy way to:

Place children on the waitlist

and

Give home provider referrals



The next slides will walk through the Search for Care process.

Search for Care gives your patrons options for care based on their

exact needs

(e.g., if they need center based care or home provider care, whether they need care in a specific housing area or if they have any special requirements, etc).

<<Back to T.O.C.

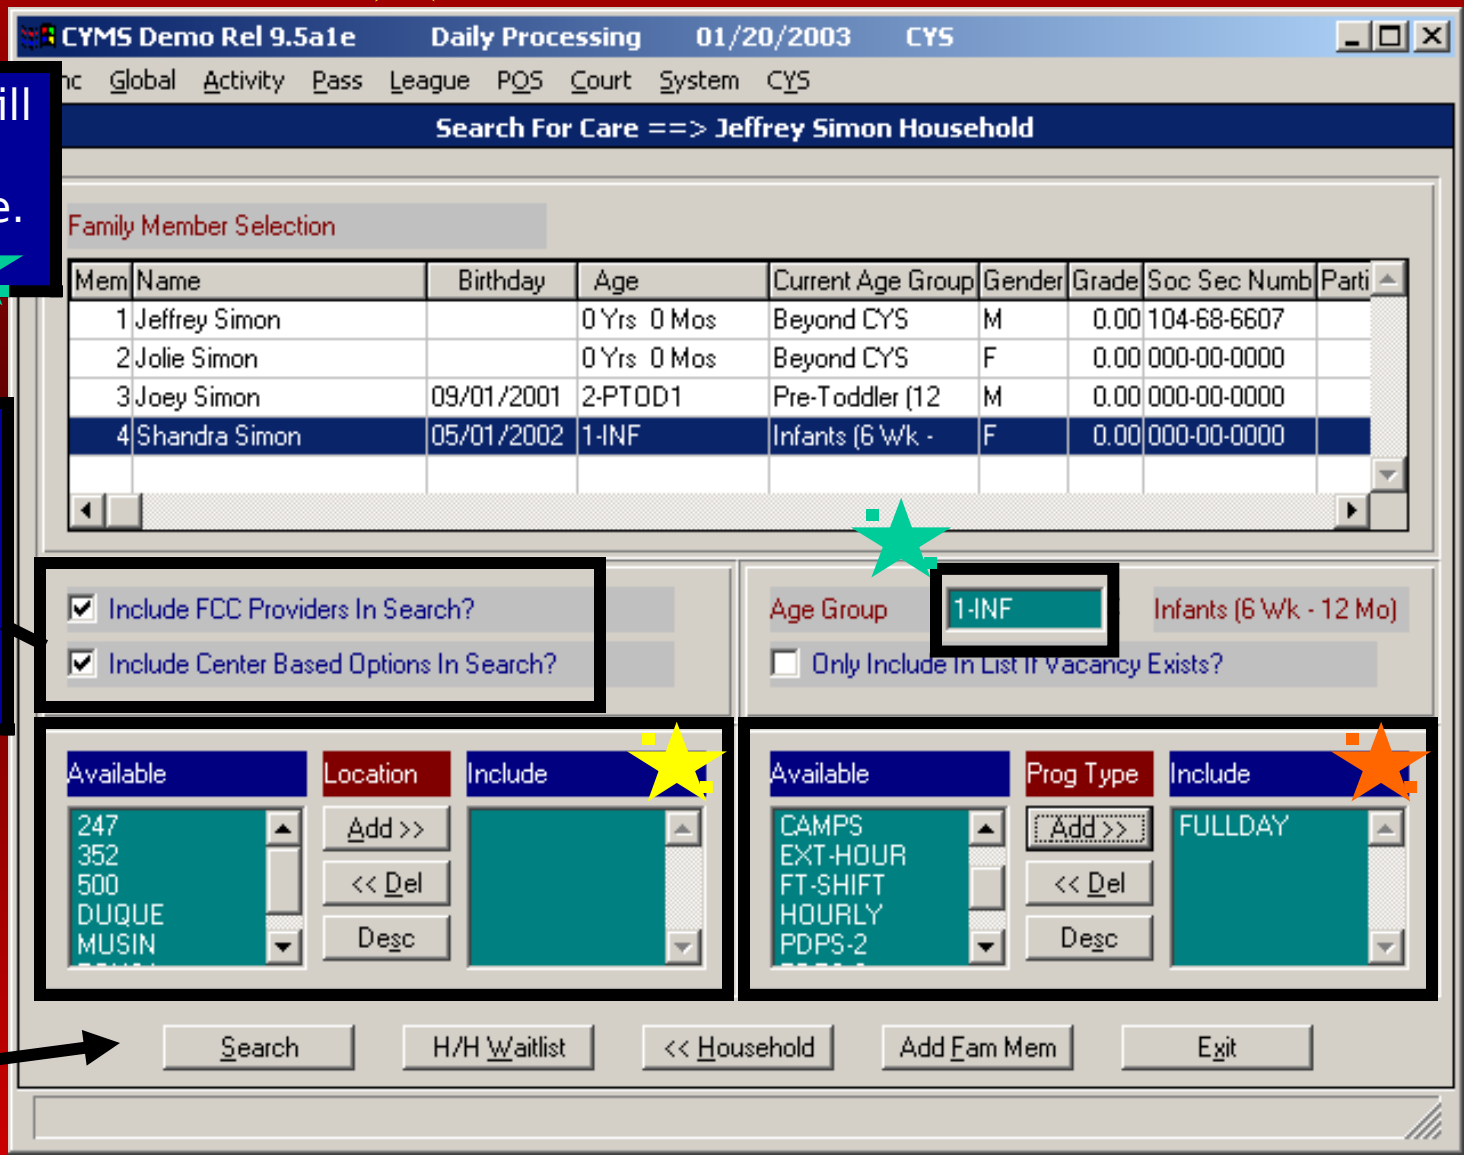
Looking for care only at a certain location? Move the building number over to include (leave the "Include" box empty to include ALL locations)

Link the program type for what the child is searching for (After School Care, Fullday care, Part Day, etc)

The Age Group will fill in automatically based on child's age. Change if needed

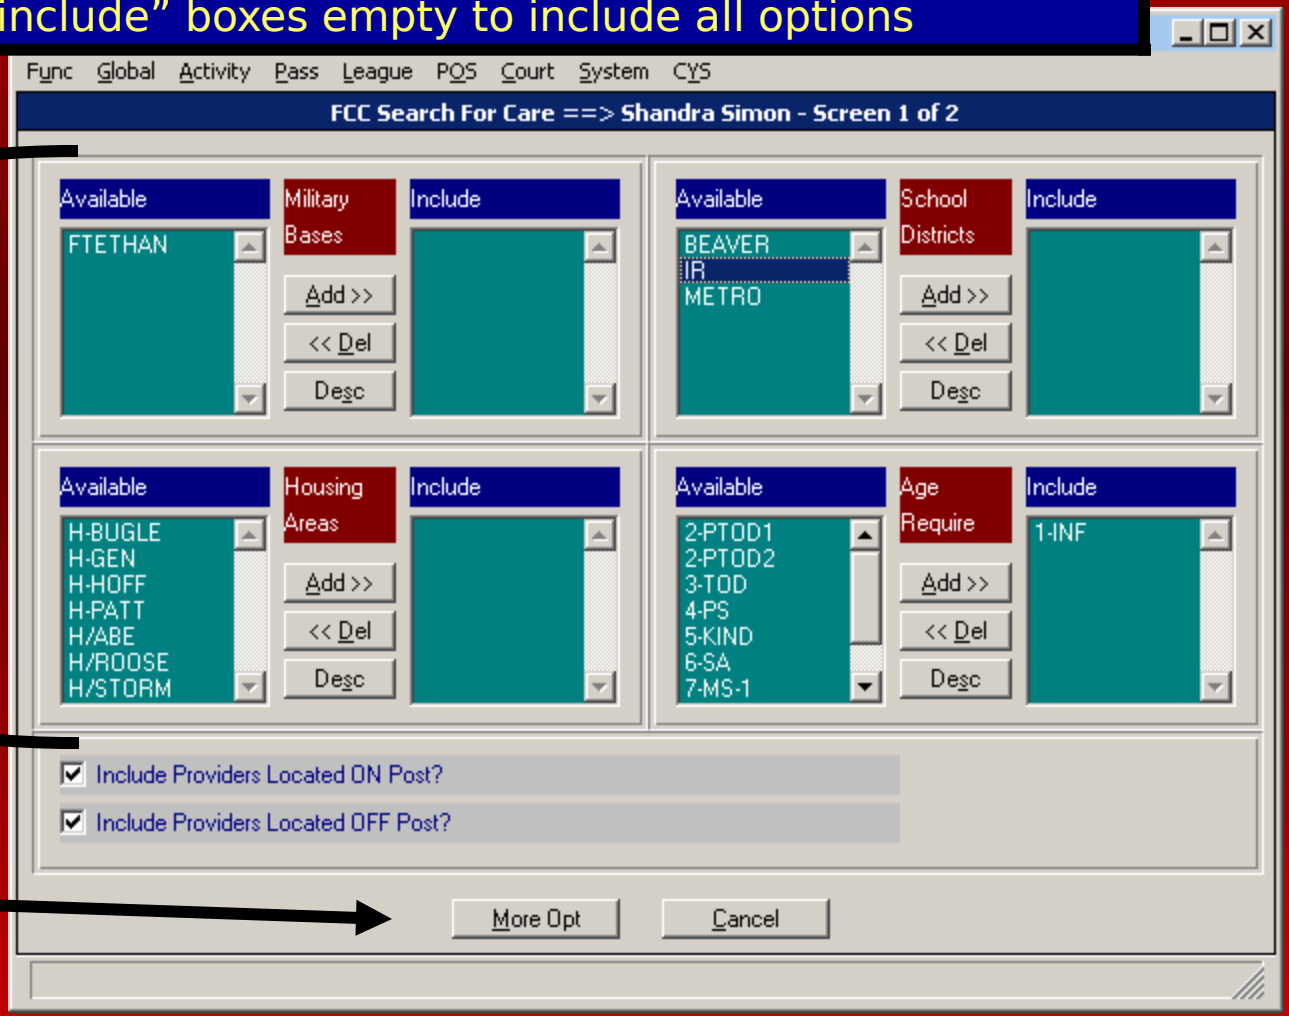
Click off if household does NOT want to include Provider/Center based care

Click Search to continue to the FCC Options



If patron is looking for providers who are only in a certain housing area, military base or school district, you may limit your search on this screen.

Leave “include” boxes empty to include all options

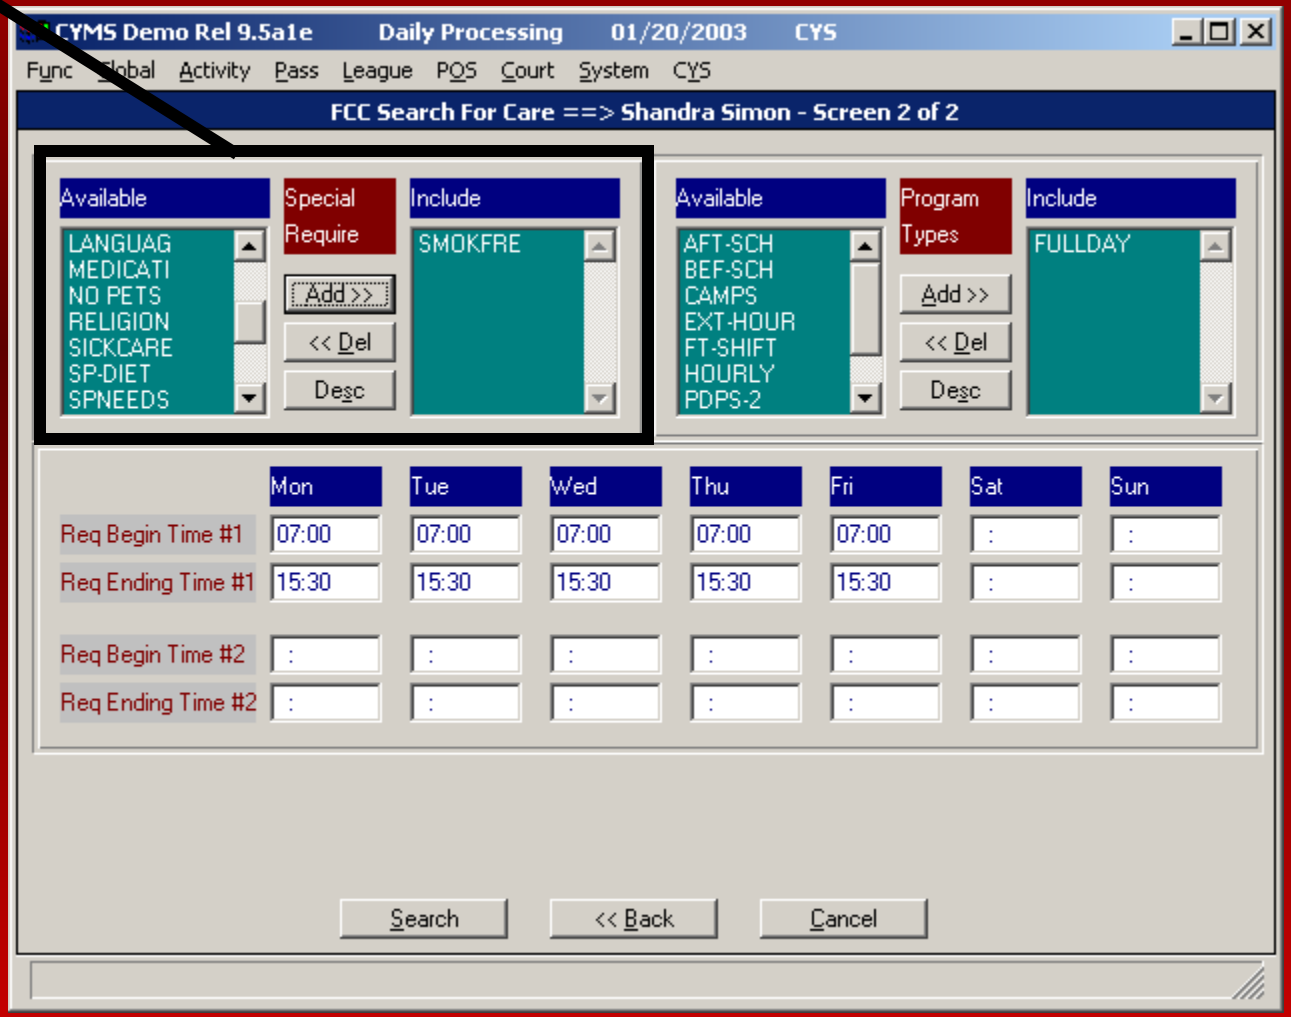


Click “More Opt” to continue with search criteria

If the child has any special requirements (wheelchair access, a home with no pets, bilingual home, extended care, etc), move all special requirements over to the include box.

Only home providers who offer these types of care will be considered a match for the parent.

Enter the times desired for care and click search. All successful results will be returned



All results that matched your search criteria are returned.

One list is returned for center based care and one for provider homes

From this screen, you may:

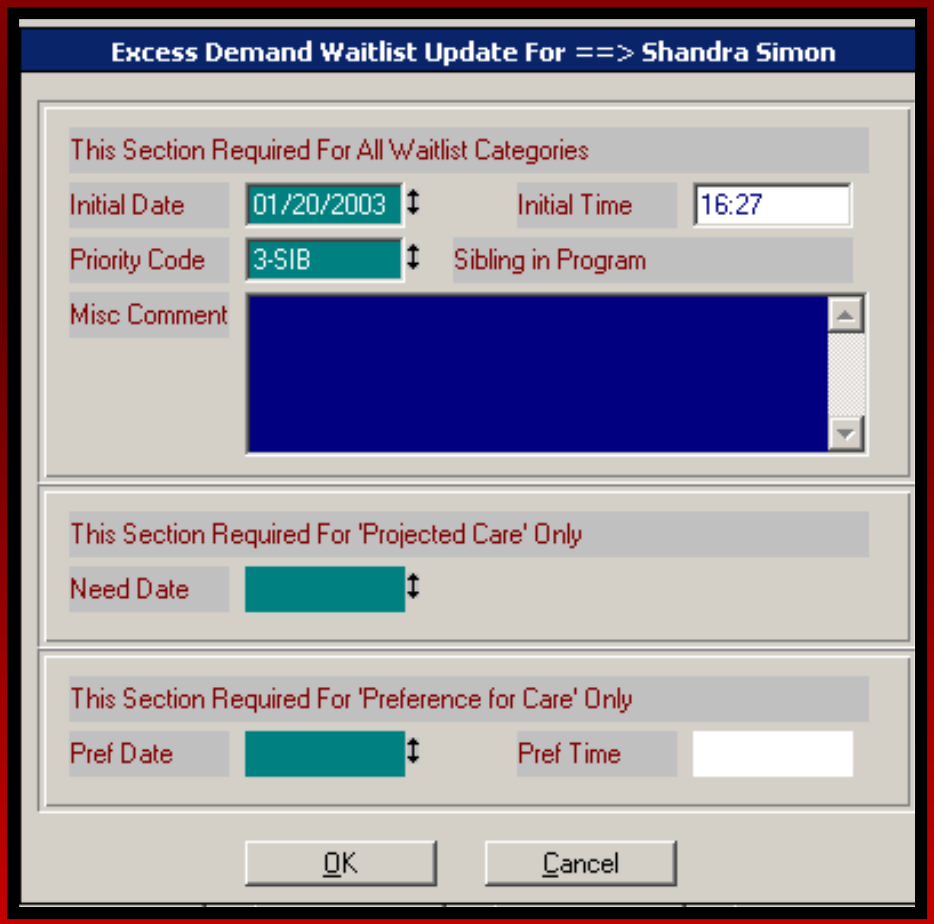
1. Add the child to the Projected Care, Excess Demand or Preference for Care waitlist
2. Print the results to hand to the patron so they may contact the providers
3. Post referrals for accurate tracking of provider referrals

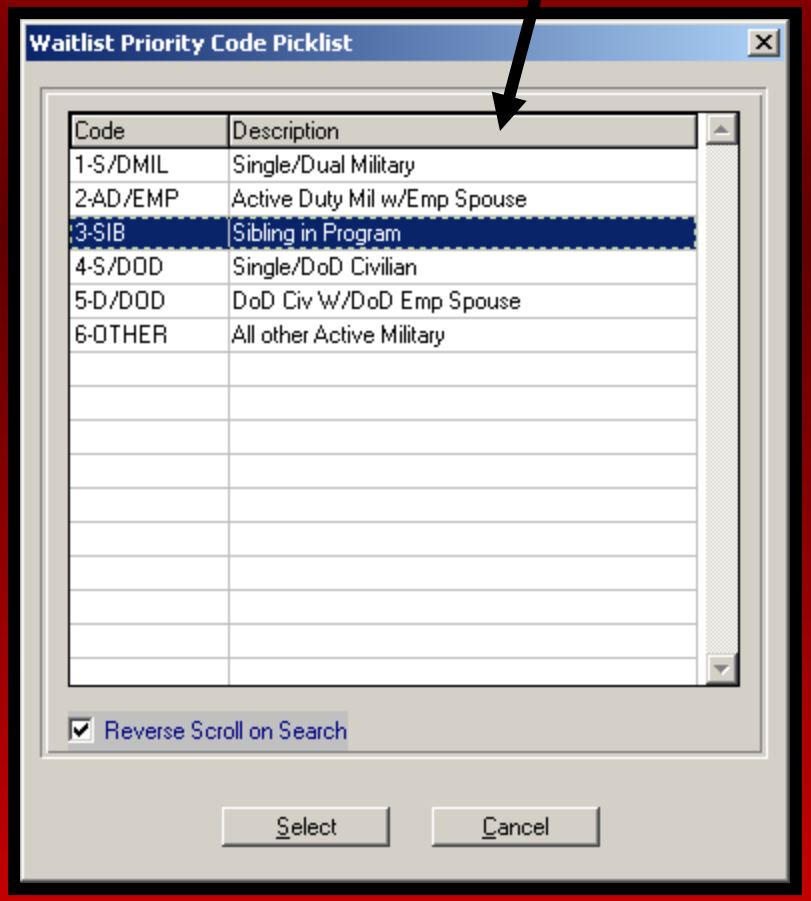
After clicking add to the waitlist, you will be brought to a screen that will contain the child's:

Initial Date, Initial Time and Priority Code.

This is essential information in determining the order the child appears in on the waitlist

Sample waitlist priority codes





CYMS Waitlists

- Per DoD Policy, three different and distinct waitlists must be maintained:
  - Projected Care – family needs care sometime in the future (unborn baby, an incoming PCS family, spouse going back to work, etc)
  - Excess Demand – family has no "viable" source of care
  - Preference for Care – family has been offered a "viable" source of CYS care (has either accepted it or turned it down) -- but wants to remain on the list waiting for a specific source of care (a certain provider, another CDC, etc).
- CYMS allows users to:
  - Easily move children from waitlist to waitlist and update/access information
  - Run real time reports with waitlists sorted by age group, priority code (if applicable)
  - Easily purge old/inactive waitlist entries
  - Easily inactivate entries if they have not renewed with your organization recently
  - Keep extensive notes on individual entries regarding renewals, refusal/offers for care, all contact information
  - Quickly shift children to the next logical age group using th[illegible]

X. Security Maintenance

Each user is given a unique USER ID to access CYMS (password protected).

User IDs are linked to Menu Groups that control what a user sees and how much access they have.

Menu Groups are completely user defined.

Give your clerks and managers access to only the programs they need or give them full rights—the choice is up to you!

Every ---

* Payment

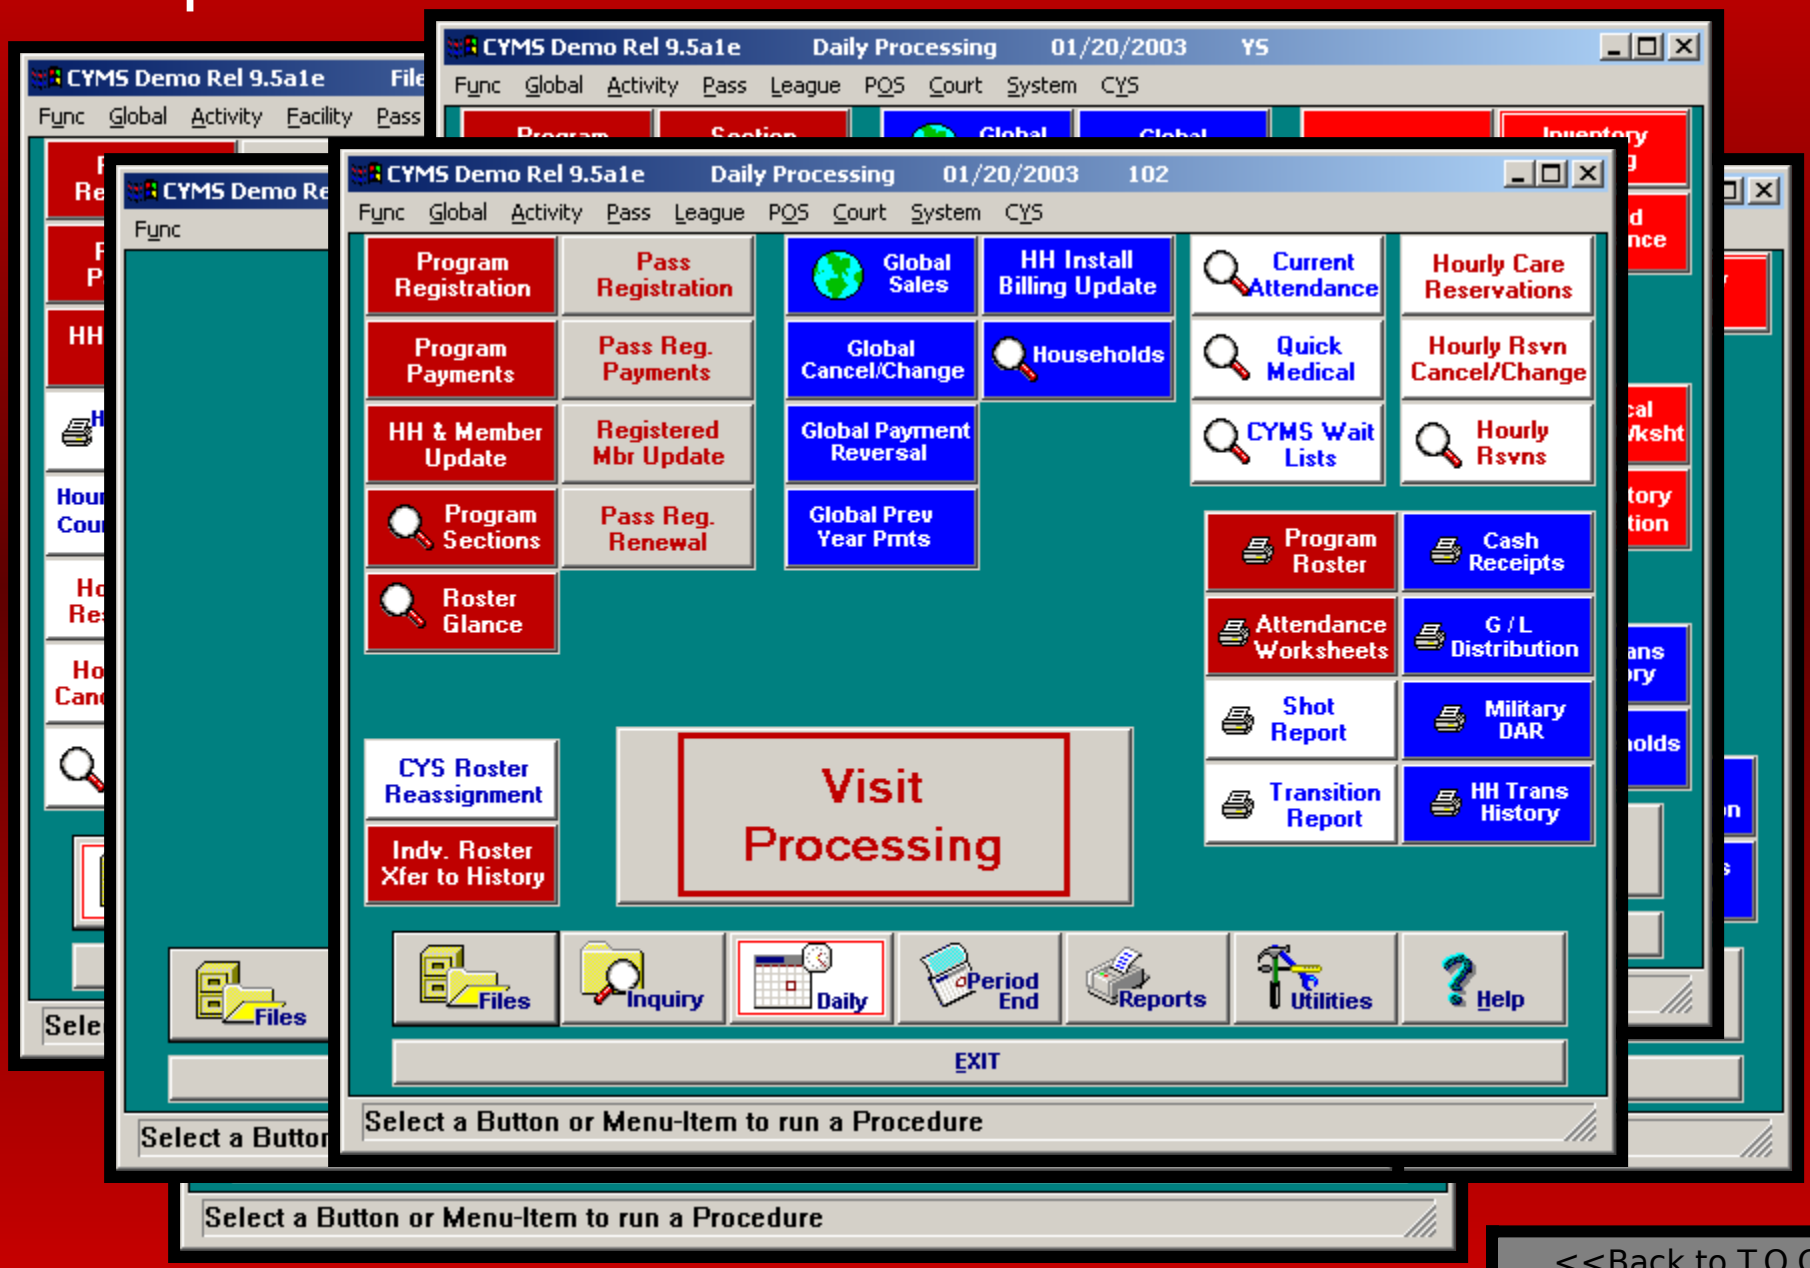
* Refund

* Non-Financial Transaction

is linked back to this USER ID for maximum security and accountability

<<Back to T.O.C.

Sample Screens



<<Back to T.O.C.

Other Features of CYMS

- Fully functional Point-of-Sale Module to run the Youth Center's Snack bar.
  - Complete Inventory/Ticket tracking
  - Touch Screen capability
  - Programmable keyboards
  - Many reports including sales reports, valuation reports, cost of goods sold, etc.
- League Module to schedule/track Youth Sports Leagues
- Rentals/Check In and Out Module for the FCC Lending Library and Youth Sports equipment issue
- Accident Reporting Module to track incidents/injuries
